

St. James.

I wanted to give you all an update to the ongoing process of improving our school safely procedures at St. James School. Father Farnan graciously purchased the school and rectory new walkie-talkie radios. Every faculty member who is in charge of students will have one of the radios. They will be on at all times during the day. The rectory will have one on at all times as well. The main use will happen during dismissal times so that the office and faculty dismissing students can be in instant communication with the office and each other. They will also be a part of our school safety during fire and lock-down drills. I cannot underscore what a big step this is for our school's safety. In the event of an emergency, good channels of communication are the best way to ensure the safety of everyone.

Peace to everyone.

Dr Swiger
